Applying Your Education Experience to Real World Success

By: Dr. Haresh Siriwardane, Ph.D/M.B.A
Director at Cabot Microelectronics – Hard Disk Drive Division, Singapore
Adjunct Professor of Physics – Center for Molecular Electronics – U. Missouri-St. Louis, Missouri-USA
Adjunct Professor of Chemistry – Clarkson University, New York, USA

Date: 24th March 2010 (Wednesday)
Time: 3pm – 4pm
Venue: SPMS-LT2

Abstract
You are fortunate to be enrolled in an EXCELLENT academic program which will grant you a Bachelors, Masters or a Doctoral degree. However, your degree is only the foundation for a challenging, yet a bright future. It is also just one piece of the puzzle; the puzzle that we all call “career”. We will be talking about many other pieces of the puzzle that MUST come together in order for you to achieve “success”. In the modern world, all companies/organizations are looking for distinctly talented young individuals who are not only knowledgeable in their fields, but also can transform knowledge to solve real world problems. How can a young graduate step into an industrial technical role to be on fast track?
