A seminar on “Publishing in Materials Science (and how to maximize your success!)” will be offered at NTU on November 21st 2013. The speaker will introduce the materials science portfolio of journals offered by Wiley; a number of the flagship journals include Advanced Materials, Advanced Functional Materials and Small. The role that scientific journals play in an Online Age will be presented and the Editorial Process with focus on peer review will be discussed. Important topics such as choosing the right journal to submit to and increasing the visibility of published content will be presented from an editor’s point of view.
