The talk will give a brief survey of our numerous activities on the wide spread field of applied electron physics like e-beam evaporation, e-beam welding, e-beam micro-structuring, electron spectroscopy (HAXPES), electron spin analysis, electron microscopy (PEEM, TOF-PEEM, NanoESCA, Momentum Microscopy, HAXPEEM, see refs.) and related topics. Some recent developments will be presented more in detail. FOCUS is an owner-managed German company established in 1990 with today more than 30 highly educated employees. We are selling all of our in-house developed products worldwide both to scientific and to industrial customers.
