New drug discovery is a complex process that requires various expertise and deep knowledge. The journey is at high risk, high cost and yet highly rewarding. This presentation will share with the audience a new drug discovery process and some key attributes in each stage. The discovery of a highly potent and efficacious Jak1/TYK2 inhibitor, that is now in Phase I clinical trial, will also be presented.

Date: 21st October 2016 (Friday)  
Time: 11:00am – 12:30pm  
Venue: SPMS Research & Graduate Studies Office Conference Room  
Host: Professor Tan Choon Hong
