Introduction to Limits

Xiao Fang
Department of Statistics and Applied Probability
National University of Singapore

Date: 13 April 2012 (Friday)
Time: 10.30am – 11.15am
Venue: MAS Executive Classroom 2, MAS-03-07
School of Physical and Mathematical Sciences

The concept of the limit of a function at a point is introduced by both numerical and graphical examples. Methods for computing limits are discussed, and the epsilon-delta definition of limit is also given.

Speaker Biography
Xiao Fang is a Ph.D. candidate and working as a Research Assistant at the Department of Statistics and Applied Probability, National University of Singapore under the direction of Prof. Louis H. Y. Chen. Before coming to Singapore, he obtained his B.Sc. degree in Mathematics from Peking University in 2007. His research interests include distributional approximations by Stein's method and their applications in statistical physics, discrete mathematics and statistics.
