Introduction to Limits

Associate Professor Dorota Kurowicka
Delft University of Technology
The Netherlands

Date: 10 June 2011 (Friday)
Time: 3.30 pm – 4.00 pm
Venue: MAS Executive Classroom 2, MAS-03-07
School of Physical and Mathematical Sciences

This talk will serve as a first introduction to the theory of limits of functions.

The target audience is first year students of Engineering or Mathematics.

Speaker Biography

Dr Dorota Kurowicka studied mathematics at Gdansk University, Poland, and specialized in numerical methods. She obtained her PhD degree from the Delft University of Technology in The Netherlands in 2001. Since then, she has been employed at Delft Institute of Applied Mathematics, first as an Assistant Professor and from 2006 as an Associate Professor. Her current research is carried out in the area of uncertainty and risk analysis with particular interest in graphical dependence models. She is co-author (with R.M. Cooke) of the book Uncertainty Analysis with High Dimensional Dependence Modelling, Wiley (2006), and joint editor (with H. Joe) of the book Dependence Modelling: Vine Copulae Handbook, World Scientific (2010).

Host: Prof. Bernhard Schmidt, Head, Division of Mathematical Sciences, School of Physical and Mathematical Sciences
