Introduction to Probability and Applications

Mr Thanh Nguyen
Centre for Applied Mathematics
Cornell University

Date: 22 February 2010 (Monday)
Time: 10.30 am – 11.30 am
Venue: MAS Executive Classroom 1, MAS-03-06
School of Physical and Mathematical Sciences

In this introductory lecture, basic concepts of probability: random variables, distribution, dependence and a surprising application will be discussed.

Speaker Biography

Mr Thanh Nguyen is a PhD candidate in Applied Mathematics at Cornell University, USA. His research focuses on network structures: graph theory, combinatorial optimization and games on networks.

Before Cornell, Mr Nguyen finished his undergraduate studies in Mathematics at Eotvos University in Budapest, Hungary.

Host: Prof Chee Yeow Meng, Head, Division of Mathematical Sciences, School of Physical and Mathematical Sciences
